

## Unit Summary – T7 Edit/VT Vehicle

Launched in 2011, T7 is a Mercedes Sprinter built with two working areas that could be used as either two separate fully equipment HD edit areas or a replay area. Both areas have sound insulation giving the production team sufficient private workable areas for their on site edit facilities or being able to expand their VT capabilities of the larger integrated production units. It has been designed to link up with any Scanner within our fleet.

FRONT EDIT AREA	BACK EDIT AREA
